

Job Overview

DLZP Group is looking for highly talented hands on AWS Solution Architects to help accelerate our growing Cloud Services business. This is an excellent opportunity to join DLZP's world class technical teams, working with some of the best and brightest engineers, while also developing your skills and furthering your career within an innovative focused leader of AWS technologies.

You will possess deep technical skills in software development and cloud architectures as well as customer facing skills at all levels of a customer organization. You should also have the ability to think strategically about business, product, and technical challenges. As a senior member of the DLZP Solutions Architect team, you will act as a trusted adviser to our managed systems customers.

Responsibilities for Solutions Architect

- Analyze current technologies used within the company and determine ways to improve
- Document and monitor requirements needed to institute proposed updates
- Work closely with Information Technology professionals within the company to ensure the hardware is available for projects and working properly
- Propose and establish a framework for necessary contributions from various departments
- Account for possible project challenges on constraints including, risks, time, resources, and scope
- Work closely with project management teams to successfully monitor the progress of initiatives
- Provide detailed specifications and diagrams for proposed solutions
- Define clear goals for all aspects of a project and manage their proper execution
- Provide the architectural guidance and recommendations necessary to promote successful engagements worldwide
- Assist customers with the definition of technical strategies that will enable them to migrate more of their systems onto the AWS platform
- Capture and share AWS best practice knowledge with our broader Solution Architect community
- Share customer feedback to internal product management and engineering teams to help drive the future of DLZP
- Work as the technical leader to provide the customer business and technical solutions
- Serve as a technical expert for business application initiatives by participating in the evaluation, planning, design, and implementation of new applications

Qualifications for Solution Architect

- Project management and leadership skills are essential
- Experience developing IT and cloud infrastructure
- Master's degree in Computer Science or Software Engineering preferred
- Current understanding of best practices regarding system security measures
- Experience in software engineering and design architecture
- Positive outlook in meeting challenges and working to a high level
- Advanced understanding of business analysis techniques and processes
- Professional experience working with and analyzing computer hardware and software
- Extensive knowledge and experience working with operating systems
- 4+ years of hands-on implementation or consulting experience
- 3+ years in customer and/or partner-facing roles
- Proven AWS development and architectural experience
- Experience working with end-user or developer communities
- Experience working across internal and external organizations
- In-depth knowledge of the software development lifecycle
- Ability to quickly learn new technology and applications
- Ability to write infrastructure as code
- Familiarity with Oracle products is a plus
- BA/BS degree or equivalent required
- AWS Solutions Architect – Associate required, Professional preferred
- Ability to travel

Must be a U.S. Citizen and U.S. based.
