

Entry Level Front End Developer

Job Overview

We are looking for an Entry Level Front End Developer who will use their knowledge of programming languages to code user-side applications, including visual elements like menu bars, clickable buttons and the overall layout of websites or web applications. You will communicate with clients/teams to identify their needs, optimizing websites for different formats and running tests to ensure code strings perform the correct functions. This position is fully remote so you must be detail oriented and self-disciplined to work remotely with a team.

Responsibilities

- Working with clients/teams to develop the overall look and design of a website
- Writing website code with programming languages such as Angular, Python, and node.js
- Producing, maintaining, and modifying websites and user interfaces
- Incorporating applications, graphics, audio and video clips into client websites
- Creating tools that enhance the user's website experience
- Ensuring websites are accessible across many platforms
- Routinely testing websites for ease of use, speed and other quality factors
- Fixing any website issues or bugs that arise

Qualifications

- 1+ years of hands on implementation or consulting experience
- 1+ years in a customer and /or partner facing roles.
- Proven cloud development experience.
- Experience with professional graphics tools
- Experience with Angular, Python, REACT, Java and node.js
- Experience working with end user or developer communities.
- Experience working across internal and external organizations.
- Thorough knowledge of the software development lifecycle.
- Attention to detail, precision, and a passion for functionality.
- Able to clearly communicate concepts.
- Ability to travel.

Must be a U.S. Citizen and U.S. based.
