

## Job Overview

We are looking for a motivated full stack developer who is passionate about designing and building user interfaces. You will work on interfaces that keep our users at the center by understanding their workflows at a detailed level and enabling them by understanding the full stack of our product. Improving productivity of data analysts and DBA(s) by innovating and simplifying the analysis and querying of data is the goal.

## Responsibilities

- Design, develop, troubleshoot, and debug software programs for databases, applications, tools, networks etc.
- Provide technical leadership to the team of software developers.
- Specify, design, and implement modest changes to existing software architecture to meet changing needs.
- You will mentor the team by providing guidance, motivation, and support.

## Qualifications

- Proven professional experience as a Full Stack Developer.
- 3+ years of programming experience in production software.
- Knowledge of multiple front-end languages and libraries (e.g., HTML/ CSS, JavaScript, XML, jQuery)
- Knowledge of multiple back-end languages (e.g., C#, Java, Python) and JavaScript frameworks (e.g., Angular, React, Node.js)
- Knowledge of SQL
- Familiarity with databases (e.g., MySQL, MongoDB), web servers (e.g., Apache) and UI/UX design.
- Skillful with multiple software development methodologies, with an emphasis and passion for Agile.
- Familiarity with data structures and algorithms.

### Preferred:

- Bachelor's degree in Computer Science or related field or related work experience.

Must be a U.S. Citizen and U.S. based.
