

Job Overview

We are looking for a Multi-Cloud Architect. The Multi-Cloud Architect leads the planning, design, and engineering of enterprise-level infrastructure and platforms related to cloud computing. The Multi-Cloud Architect work assignments involve moderately complex to complex issues where the analysis of situations or data requires an in-depth evaluation of variable factors.

Qualifications:

- Minimum of 2 years of experience in 2 or more cloud services (e.g., AWS, Azure, Google, etc).
- Demonstrate knowledge of cloud architecture and implementation features (OS, multi-tenancy, virtualization, orchestration, elastic scalability).
- Demonstrate knowledge of DevOps tool chains and processes.
- Act as a Subject Matter Expert to the organization for cloud end-to-end architecture, including AWS and future providers, networking, provisioning, and management.
- Develop a library of deployable and documented cloud design patterns, based on application portfolio, as a basis for deploying services to the cloud.
- Demonstrate leadership ability to back decisions with research and the "why," and articulate several options, the pros and cons for each, and a recommendation.
- Maintain overall industry knowledge on latest trends, technology, etc.
- Develop solutions architecture and evaluate architectural alternatives for private, public and hybrid cloud models, including IaaS, PaaS, and other cloud services.
- Contribute to DevOps development activities and complex development tasks.
- Define optimal design patterns and solutions for high availability and disaster recovery for applications.

Must be a U.S. Citizen and U.S. based.
